Swissgrid concludes additional share capital increase

At the extraordinary General Assembly of Swissgrid Ltd held on 4 December 2017, shareholders agreed to the proposals of the Board of Directors. A capital increase was accepted for the acquisition of further parts of the transmission grid as of 3 January 2018. The Federal Council is expected to approve the amendments to the articles of incorporation, which are required for transactional reasons, by the end of December 2017.

Swissgrid will acquire additional facilities pertaining to the transmission grid as at 3 January 2018. Their provisional book value totals CHF 2.3 million. In the autumn of 2018, the value will be adjusted to balance out the difference between the book values and the system values imposed by the Swiss Electricity Commission (EiCom) during 2018. As with acquisition transactions completed at the start of 2013, 2014, 2015 and 2016, the previous owner will receive compensation, 30% of which will be Swissgrid shares and 70% loans. As the result of a capital increase, new Swissgrid shares are created for that with a nominal value of CHF 0.2 million (half of them are registered A shares and registered B shares). The nominal share capital thereby increases to CHF 318.1 million.

Planned statute changes

The amendments to the articles of incorporation of Swissgrid Ltd, which are required for transactional reasons, are to be approved by the Federal Council in December 2017.

Powering the future – Swissgrid is the national grid company. As the owner of Switzerland's extra-high-voltage grid, it is responsible for the safe operation of the grid without discrimination, and for maintaining, modernising and expanding the grid efficiently and with respect for the environment. Swissgrid employs over 450 highly qualified people from 24 countries at its sites in Frick, Laufenburg, Uznach, Landquart, Ostermundigen, Prilly and Castione. As a member of the European Network of Transmission System Operators for Electricity (ENTSO-E), it is also responsible for grid planning, system management and market design in the cross-border exchange of electricity in Europe. Several Swiss electricity companies hold the majority of Swissgrid's share capital.
